

NEW!

TomTom[®] WORK

Connected Navigation

Compact

Always connected to your people on the road.

TomTom WORK Compact

How does it work?

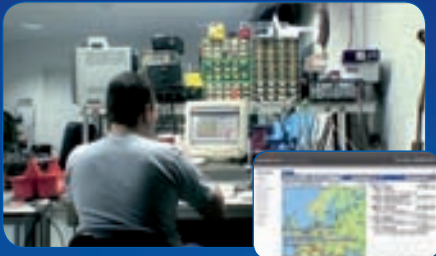

It couldn't be easier! Each vehicle navigates and communicates with the help of the TomTom GO 715. The TomTom GO 715 has a built-in SIM card that enables you to send messages and location-information between the vehicle and the online TomTom WEBFLEET system, via the mobile GPRS network. TomTom WEBFLEET is accessible via all PC's with internet access. All of which gives you easy, flexible Connected Navigation.

TomTom WORK Compact is your flexible solution. The TomTom GO 715 can easily be taken from one vehicle to another. It works straight out of the box, no installation necessary.

- **Accurate door-to-door navigation and two-way communication via TomTom GO 715:**
 - Enables your drivers to navigate straight to their next job, which makes their life a lot easier and less stressful
 - Provides two-way communication between the office and your mobile workforce
- **Real time management of your vehicles TomTom WEBFLEET:**
 - Easy location of your vehicles on digital maps via your computer
 - At-a-glance overview of everybody's job status
 - (re) Allocate tasks easily to the person best placed to take a new job
- **Professional reporting made simpler and clearer for everyone:**
 - Generates basic reports such as: Trip Reports, Message Reports, Working Times, Event Reports and Order Reports
- **Incredibly user-friendly:**
 - No software installation, training or IT maintenance necessary

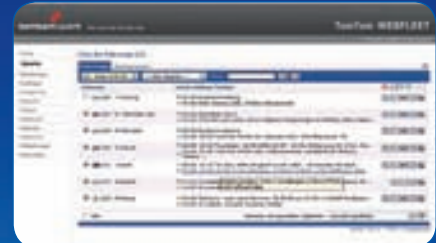

A day in the life with Connected Navigation

Follow your vehicles on digital maps on your computer

The driver informs the office he has started his working day

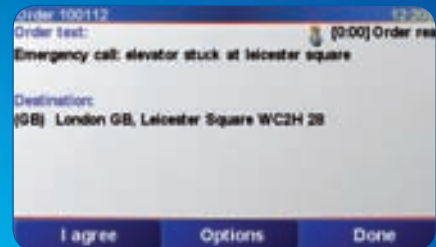

The office gets a quick overview of all outstanding orders

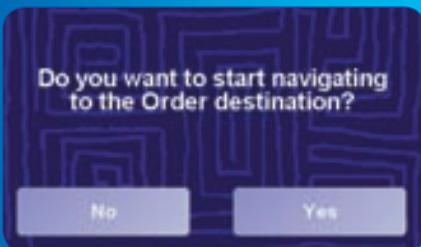

Send new orders with address information directly to the driver best positioned to take the job

The driver sees he has received a new order request via his TomTom GO

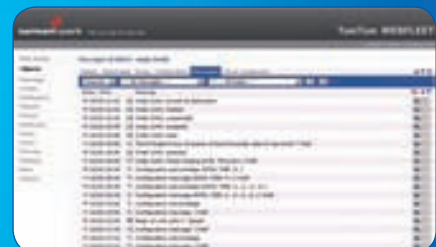

He can now accept the order by tapping the "I agree" button

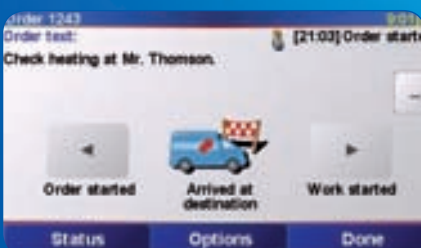

Navigation can start immediately

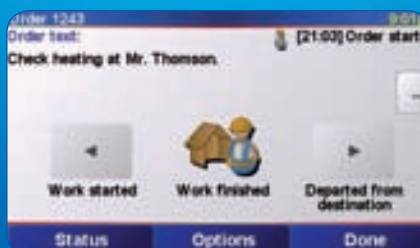

The order has now been started

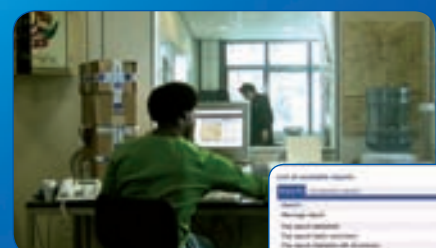

The order status is reported to the TomTom WEBFLEET system in the office

The driver informs the office he has arrived at the order destination

He reports when the order is finished

Get different types of reports such as message reports, trip reports and status reports in a CSV or PDF format
